

Growth Marketing

Açıklama

Growth marketing training introduces participants to modern marketing strategies and techniques. It aims to enable your company to achieve its growth goals by equipping them.

This training emphasizes the importance of data-driven approaches and continuous experimentation, unlike traditional marketing methods. Participants learn tools such as A/B testing, personalization techniques, viral marketing, and scalable growth tactics to develop effective strategies in areas such as customer acquisition, retention, and revenue growth.

And with successful case studies and real-world applications by being supported, participants are encouraged to develop innovative ideas and strategies that will make your company more competitive.

During 1 full-day online training, examples from different sectors along with theoretical knowledge cases are examined. At the end of each section, the topics are better with a question and answer and discussion section. It is aimed to be comprehended. By discussing internal cases, how theoretical knowledge can be put into practice exemplified.
