

Adobe Illustrator - Introduction

Duration: 2 Days

Description

This introductory course covers some of the basic and more commonly used features of Adobe Illustrator, so that delegates can navigate the software and use Illustrator's tools to create and work with vector graphics.

Delegates will learn how to

- Create vector artwork using Illustrator
- Format paths using fills and colour
- Understand and use the Pen Tool
- Add type to designs
- Manage artwork using layers
- Output graphics in different file formats

Outline
