

Professional Scrum Product Owner

Duration: 2 Days · **Training format:** Virtual Classroom / Online

Description

Professional Scrum Product Owner refers to an important role within the Scrum framework, which is the person who takes responsibility for the development of the product. In the Scrum ecosystem, the product owner is a member of the team and deals with the management of the product and focuses on understanding the needs of customers or stakeholders, setting priorities and providing direction to the team.

Professional Scrum Product Owner™ is a 2-day course that provides the foundational knowledge needed to work with Scrum in a highly practical way. The course is a combination of instruction and team-based exercises where students experience how the Scrum framework improves product development efforts.

Delegates will learn

- Over the 2 days, students will develop and solidify their knowledge of being a Product Owner through instruction and team-based exercises. The breadth of the role's responsibilities in delivering a successful product will become more clear from an Agile perspective. Metrics are identified to track the creation of value and the successful delivery of the product to the marketplace.
- The PSPO course is much more than just a set of slides and an instructor. In this course, students work on real-life cases with other classmates together as a team. This course is made up of discussions and hands-on exercises.

Audience

The Professional Scrum Product Owner course may be interesting to all involved in software development upon the Scrum framework, but has been specifically conceived for those responsible over products from a business and product management perspective and taking up the highly accountable role of Scrum Product Owner.
