

SQL Server Reporting Services 2016 for Report Writers

Duration: 4 Days · **Training format:** Virtual Classroom / Online

Description

This Introduction to SQL Server 2016 Reporting Services (SSRS) training class teaches students how to create, format, and manage SQL Server 2016 Reporting Services reports. This course focuses primarily on the Report Designer tool in the SSDT-BI for Visual Studio. Attendees will also work in and become familiar with Report Builder and Report Manager.

Delegates will learn how to

- Use Report Designer and Report Manager.
- Work with solutions and projects.
- Create basic reports.
- Enhance reports with formatting, images, and charts.
- Effectively group and summarize data.
- Work with parameterized reports.
- Build dynamic reports with expressions and parameters.
- Incorporate charts and custom maps.
- Work with drillthrough reports.
- Manage reports.
- Utilize Report Builder.

Outline
