

Symantec NetBackup 7.5 for Windows: Administration

Duration: 2 Days · **Training format:** Virtual Classroom / Online

Description

Symantec NetBackup is an enterprise level heterogeneous backup and recovery suite. It provides cross-platform backup functionality to a large variety of Windows, UNIX and Linux operating systems. The Symantec NetBackup Platform is a holistic backup and recovery solution that is optimized for virtually any workload, whether physical, virtual, arrays, or big data, and delivers truly flexible target storage options, whether tape, 3rd party disk, appliances, including the NetBackup Deduplication Appliances and Integrated Backup Appliances, or cloud.

This Symantec NetBackup 7.5 for Windows: Administration course provides the IT professional with instruction on the functionality of Symantec NetBackup 7.5 software.

This course covers the general principles of using NetBackup to develop and implement a storage management strategy

Delegates will learn how to:

- Install, configure, and operate NetBackup 7.5.
- Manage NetBackup using the graphical interfaces, commands, and scripts.
- Provide service protection and recovery.
- Use the NetBackup Activity Monitor, NetBackup reports, and, and OpsCenter to monitor NetBackup activity.
