

TOGAF 10 Level 1 and Level 2

Duration: 4 Days · **Training format:** Virtual Classroom / Online

Description

The Open Group Architecture Framework (TOGAF) is a framework for enterprise architecture which provides a comprehensive approach for designing, planning, implementing, and governing an enterprise information architecture.

The TOGAF Standard, Version 10, is an update to the TOGAF 10 standard providing improved guidance, correcting errors, improving the document structure, and removing obsolete content. Key enhancements made in this version include updates to the Business Architecture and the Content Metamodel. All of these changes make the TOGAF framework easier to use and maintain. It retains the major features and structure of the previous version of the standard including

Modular Structure

Content Framework.

Extended Guidance

Architectural Styles

This 4 day course is designed to enable candidates to develop the knowledge of the terminology and basic concepts of TOGAF® 10 and principles of Enterprise Architecture. Candidates will also be able to analyze and apply knowledge of TOGAF®.

Delegates will learn how to:

- prepare to TOGAF examination and become TOGAF Certified
- obtain C-level support when implementing EA in your organization
- adopt and implement tools and practical examples of Enterprise Architecture

Outline

Introduction

Basic Concepts

Core Concepts
